GREAT 5G Forward Portfolio

Portfolio Factsheet

The GREAT 5G Forward Portfolio provides passive equity exposure to companies involved in the global 5G connectivity ecosystem through publicly listed securities. The portfolio is designed to represent the 5G value chain across network infrastructure, semiconductors, hardware platforms, software, and supporting technology services that enable next-generation connectivity.

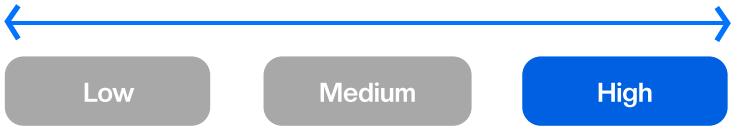

Constituent inclusion is based on defined eligibility criteria assessing a company's relevance within the 5G connectivity ecosystem, rather than narrow industry classification or traditional market-capitalization weighting. The portfolio is intended for investors seeking long-term exposure to next-generation connectivity through a transparent, systematic, and institutionally structured investment approach aligned with the phased rollout, adoption, and monetization cycles of 5G technology.

Risk Indicator

Investment Objective

The portfolio seeks to provide long-term capital appreciation by delivering diversified, passive exposure to publicly listed companies with material participation in the 5G connectivity ecosystem, while managing concentration, liquidity, and structural risks inherent to infrastructure- and technology-focused investing.

Investment Methodology

- Passive, rules-based portfolio construction
- Thematic eligibility framework focused on quantum computing relevance
- No discretionary security selection or tactical positioning
- Periodic, rules-driven reviews to maintain thematic integrity

Portfolio composition is determined using predefined inclusion criteria assessing a company's role within the 5G value chain, market liquidity, and investability. Portfolio changes are implemented through systematic monthly rebalancing in accordance with the established methodology.

Thematic Exposure Framework

The portfolio represents multiple segments of the 5G connectivity value chain, including:

- **Network equipment and core infrastructure**
- **Connectivity-focused semiconductors and chipsets**
- **Telecommunications and communication services**
- **Data infrastructure, storage, and software platforms**
- **Fiber, towers, and physical connectivity assets**
- **Devices and endpoints supporting 5G adoption**

Constituent eligibility is reviewed through the monthly rebalancing process to ensure continued alignment with the defined thematic scope.

Portfolio Governance & Review Process

Portfolio composition is reviewed and rebalanced monthly under a predefined governance framework. Reviews are conducted to:

- **Confirm continued eligibility within the 5G connectivity ecosystem**
- **Maintain diversification across value-chain segments**
- **Assess liquidity and market accessibility**
- **Implement methodology-defined reconstitutions**

Portfolio changes are systematic and methodology-driven. No discretionary overrides are applied.

Investor Suitability

This portfolio may be appropriate for investors who:

- **Seek passive exposure to next-generation connectivity infrastructure**
- **Have a medium- to long-term investment horizon**
- **Understand and accept volatility associated with technology and infrastructure cycles**
- **Prefer transparent, systematic portfolio construction**
