GREAT Funds

GREAT South Korea Select Portfolio

Portfolio Factsheet

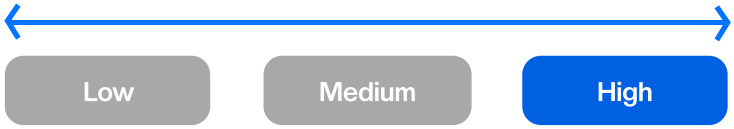

The GREAT Korea Select Portfolio provides passive equity exposure to companies associated with the South Korean economic ecosystem through publicly listed securities. The portfolio is designed to represent key segments of the Korean market across industrials, utilities, financial services, telecommunications, and export-oriented businesses that contribute to the country's economic activity.
Constituent inclusion is based on predefined eligibility criteria assessing a company's material exposure to the Korean economy, including operational presence, revenue linkage, and market participation, rather than conventional sector classifications alone. The portfolio is intended for investors seeking long-term exposure to South Korea through a transparent, systematic, and institutionally structured investment approach.

Risk Indicator

Investment Objective

The portfolio seeks to provide long-term capital appreciation by delivering concentrated, systematic exposure to publicly listed companies with material linkage to the South Korean economy, while managing concentration, liquidity, and structural risks associated with single-country investing.

Investment Methodology

- **Passive portfolio construction based on defined eligibility criteria**
- **Geographic framework focused on South Korea exposure**
- **No discretionary security selection or tactical positioning**
- **Monthly portfolio rebalancing to maintain allocation efficiency and diversification**

Portfolio composition is determined using predefined inclusion criteria assessing country exposure, market relevance, liquidity, and investability. Portfolio weights are constructed using a rules-based efficient frontier allocation framework. Portfolio changes are implemented through systematic monthly rebalancing in accordance with the established methodology.

Basic Materials	14.72
Financial Services	14.45
Utilities	4.17
Consumer Cyclical	4.17

Asset-class Breakdown

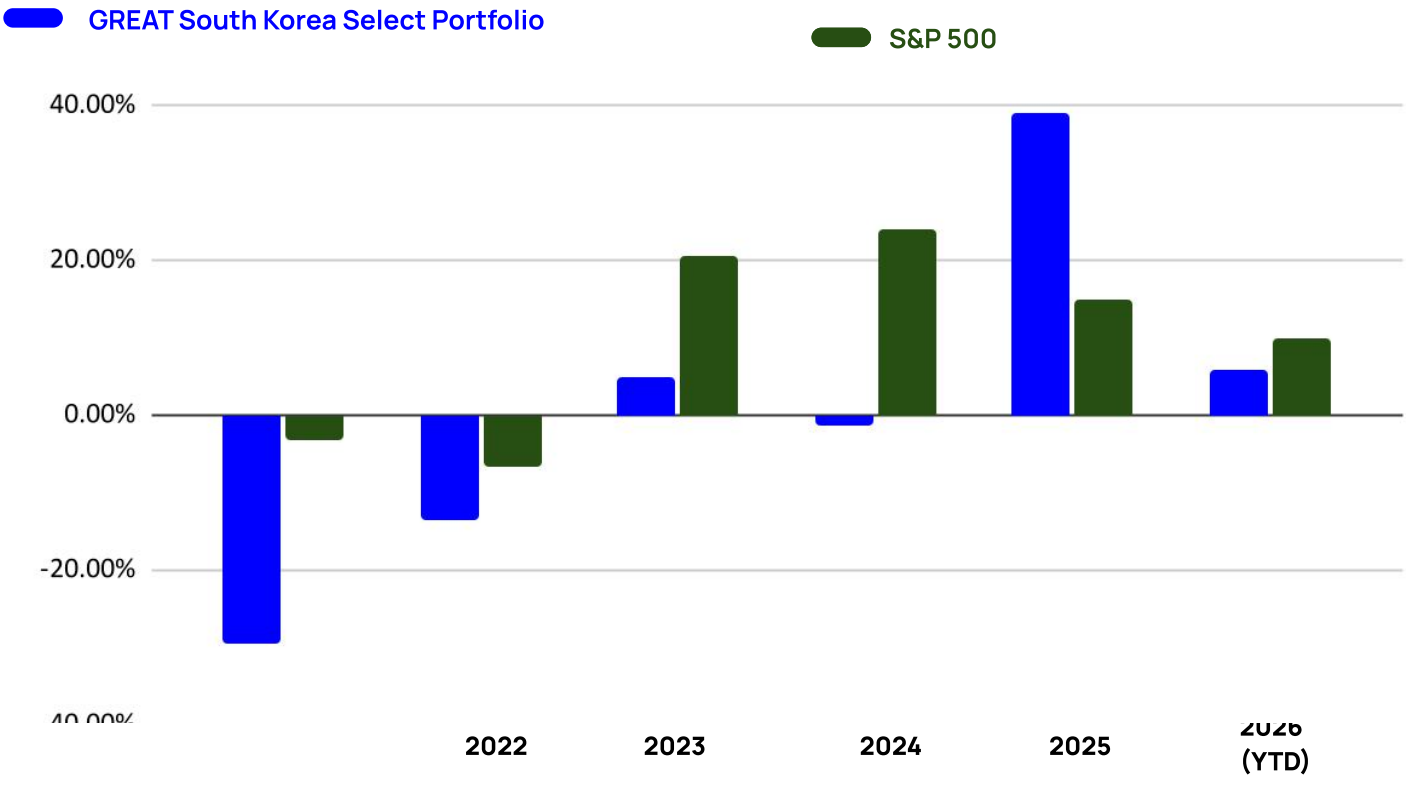

Sector allocations reflect functional exposure within the South Korean economic ecosystem rather than conventional equity sector classifications.

Model Returns of Hypothetical $100 Invested

Model Returns for Last 5 Calendar Years

Thematic Exposure Framework

The portfolio represents multiple segments of the South Korean economy, including:

- **Financial services and capital intermediation**
- **Power generation and energy infrastructure**
- **Telecommunications and digital connectivity**
- **Industrial production and export-oriented manufacturing**
- **Consumer platforms and domestic economic activity**

Constituent eligibility is reviewed through the monthly rebalancing process to ensure continued alignment with the defined geographic scope.

Portfolio Governance & Review Process

Portfolio composition is reviewed and rebalanced monthly under a predefined governance framework. Reviews are conducted to:

- **Confirm continued eligibility within the South Korean economic ecosystem**
- **Maintain diversification across economic segments**
- **Assess liquidity and market accessibility**
- **Implement methodology-defined reconstitutions**

Portfolio changes are systematic and methodology-driven. No discretionary overrides are applied.

Investor Suitability

This portfolio may be appropriate for investors who:

- **Seek passive exposure to South Korea's equity market**
- **Have a medium- to long-term investment horizon**
- **Understand and accept volatility associated with single-country investing**
- **Prefer transparent, systematic portfolio construction**
